IMPORTANT SAFEGUARDS

Read all instructions before using the electric appliance. The following basic precautions should always be followed:

1. This appliance is not intended for use by persons (including children younger than 8) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have supervision.

2. Check if the voltage indicated on the appliance corresponds to the local main voltage before you connect the appliance.

3. Do not use the appliance if the plug, the main cord or the appliance itself is damaged. Always make sure that the plug is inserted properly into a wall outlet.

4. Do not operate any appliance with a damaged cord or plug, after the appliance malfunctions, or has been damaged in any manner. Return the appliance to the nearest authorized service facility for examination, repair, or adjustment.

5. Close supervision is necessary when any appliance is used near children. Children should be supervised to ensure that they do not play with the appliance. Cleaning and user maintenance shall not be done by children unless they are older than 8 and supervised.

6. Do not let the cord hang over the edge of the table or counter or touch hot surfaces.

7. To protect against electric shock, do not immerse cord, plugs, or appliance in water or other liquid. Do not plug in the appliance or operate the control panel with wet hands.

8. Never connect this appliance to an external timer switch or separate remote-control system in order to avoid a hazardous situation. To disconnect, turn off the appliance, then remove plug from wall outlet.

9. Do not place the appliance on or near combustible materials such as a tablecloth or curtain. The accessible surfaces may become hot during use. Do not place on or near a hot gas or electric burner, or in a heated oven.

10. Do not place the appliance against a wall or against other appliances. Leave at least 4 inches of free space on the back and sides and 4 inches of free space above the appliance. Do not place anything on top of the appliance.

11. Do not use the appliance for any other purpose than described in this manual. The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.

12. Do not let the appliance operate unattended. Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.

13. Do not use outdoors.

14. Do not touch the hot surfaces; use handle. During air frying, hot steam is released through the air outlet openings. Keep your hands and face at a safe distance from
the steam and from the air outlet openings. Also be careful of hot steam and air when you remove the basket from the appliance.

15. After using the appliance, avoid contact with the hot metal inside. Unplug from outlet when not in use and before cleaning. Allow the appliance to cool before cleaning.

16. Immediately unplug the appliance if you see dark smoke coming out of the appliance. Wait for the smoke emission to stop before you remove the basket from the appliance.

17. For household use only.

CORD AND PLUG SAFETY

• A short power-supply cord is provided to reduce risk of becoming entangled in or tripping over a longer cord.

• Extension cords may be used if care is exercised in their use.

• If an extension cord is used:
  a. The marked electrical rating of the extension cord should be at least equal to the electrical rating of the appliance; and
  b. The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over.

ELECTRICAL POLARIZED PLUG

This unit has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, the plug is intended to be used by inserting it into the electrical outlet only one way. If the plug does not fit securely into the outlet, reverse the plug and re-insert. If it still does not fit, contact a qualified electrician for assistance. Do not modify the plug in any way.

COOKING TIPS

• For an extensive list of foods and their ideal amounts, temperature and time settings, along with preparation notes, see the **Air Fry Cooking Chart** and **Dehydrate Chart** on pages 64 through 67 of the **Gourmia Recipe Book**.

• Air fryers perform similar to ovens, refer to oven instructions on item packaging or recipe.

• Snacks that can be prepared in an oven can also be prepared in the air fryer.

• Smaller ingredients usually require a slightly shorter cook time than larger ingredients.

• Turning or tossing food halfway through cook time will deliver evenly browned and crispy results. (See Turn Reminder on page 9).

• Add 1 tablespoon of oil to fresh potatoes for a crispy result. Air fry the ingredients within a few minutes after adding the oil.

• **Do not** prepare foods that will produce a large amount of grease in the air fryer.

• Place a baking pan or an oven-safe dish or pan in the Basket to bake a cake or quiche or to air fry fragile or filled ingredients.

2. Remove the plug from the outlet.

3. Let the air fryer cool down completely. Remove the Basket from the air fryer to cool it down quicker.
