Welcome to the Delicious & Aromatic World of a 6-in-1 Coffee Maker from Gourmia

Congratulations on your purchase of your 6-in-1 K-Cup Coffee Maker from Gourmia, exclusively designed for the discerning coffee house beverage lover!

If you are one of those people who appreciates the convenience of an all in one practical kitchen appliance, then you’ll love using our 6-in-1 K-Cup Coffee Maker. Create a perfectly balanced coffee, latte, cappuccino or teas with the push of just one button! With its well thought out design and easy operation you’ll never again have to think twice about which type of hot, fresh drink to make.

The pages of this manual offer full and comprehensive instructions to guide you through the functions and features of the Gourmia 6-in-1 K-Cup Coffee Maker. Inside this guide you will also find information on its modes of operation, complete step-by-step instructions for the operation, assembly, cleaning, and maintenance of your appliance.

Please read all safety instructions thoroughly to ensure safe usage at all times.

Thank you for your purchase! We sincerely hope you will enjoy this as well as all the many innovative products brought to you by our family at Gourmia.
Important Safety Instructions

1. Read all instructions.
2. Make sure that your outlet voltage corresponds to the voltage stated on the rating label of the coffee maker.
3. To protect against fire, electric shock and injury to persons do not immerse cord, plug or unit in water or other liquid.
4. Close supervision is necessary when any appliance is used by or near children.
5. Unplug from outlet when not in use and before cleaning. Cool down the appliance before putting on or taking off parts, and cleaning the appliance.
6. Do not operate any appliance with a damaged cord or plug, after the appliance malfunctions, or has been damaged in any manner. Return appliance to an authorized service facility for examination, repair or adjustment.
7. The use of an accessory not recommended by the appliance manufacturer may result in fire, electric shock or personal injury.
8. Do not let cord hang over edge of table or counter, or touch hot surface.
9. Do not place on or near a hot gas, electric burner or in a heated oven.
10. Use on a hard, flat level surface only- to avoid interruption of airflow underneath the appliance.
11. While in use keep hands and utensils out of container to avoid injury and damage to the frother.
12. Only fill the water reservoir with clean and cold water. Never fill it with mineral water, milk or other liquids.
13. Do not let the coffee maker operate without water to avoid damaging the heating elements.
14. Never insert finger into the capsule holder to avoid nipping.
15. This appliance should only be used for coffee and tea. Do not use appliance for any other function.
16. To disconnect, remove plug from wall outlet. (Always hold the plug- never pull the cord.)
17. Some parts of appliance are hot when operated- do not touch. Use handles or knobs only.
18. While in use- do not leave the appliance unattended.
19. Store in a cool dry place.
20. Do not leave the appliance exposed to sun, rain etc.
21. Always operate the appliance with cover in place.
22. This appliance is not intended to be operated by means of an external timer or separate remote-control system.
23. This appliance can be used by children 8 years and above and persons with reduced physical, sensory or mental capabilities- if they have been given instructions concerning the use of the appliance- and understand the hazards involved. Cleaning and user maintenance shall not be made by children without supervision.
24. Children should be supervised to ensure that they do not play with the appliance.
25. This appliance has been incorporated with a grounded plug. Please ensure the wall outlet in your house is well earthed.
26. Do not use appliance for other than intended use.
27. Do not use outdoors or for commercial purpose.
28. If the appliance shuts down during working- do not take out the funnel. The funnel can only be removed after the appliance turns on again.
29. To disconnect- turn off the unit, then remove plug from wall outlet. Scalding may occur if the lid is removed during the brewing cycles.
30. Use only in a grounded outlet.

Using Your Coffee Maker For The First Time

1. Carefully unpack your Coffee / Tea Maker and remove all packing materials.
2. Remove any dust that may have accumulated during packaging.
3. It is advisable to first wash all removable parts with warm soapy water and soft cloth. Rinse and dry thoroughly.
4. Run a full water cycle in the coffee machine and built-in milk frother.
5. Place a mug or coffee cup on the cup holder grid.

- Insert the milk spout. Fill the milk tank and make sure it is inserted in the correct position. If not inserted properly the machine will not operate.
- Before brewing- make sure the tank is filled with enough water.
- Lift the water reservoir lid- fill the reservoir with the desired amount of water and ensure it does not exceed MAX mark on the reservoir. Never use warm or hot water to fill the water reservoir. Close the water reservoir lid.
- Plug in and press the power button. The machine will start pumping water for three seconds, then the power button will flash. The system will start preheating. When the power button stops flashing the machine is in standby mode and ready to start brewing.

Note:
Two beeps continuously means the tank needs water. The beeping will stop when water is added. One beep means the foaming chamber is not well positioned correctly. Reposition or check if the magnet cover is missing.

- You can adjust the cup shelf for tall or short cups. When placing the cup shelf into the machine- hold the bottom of the cup shelf, and insert the protruding end into slot. When taking out the cup shelf, hold the bottom of the cup shelf and lift it out.

Milk Tea:
- Fill the reservoir with water.
- Take out the milk tank and fill with milk. Place the milk tank back in its correct position.
- Add 3g tea leaf into the tea adapter- twist and close. Close the top lid making sure to hear a click sound.
- Press the milk tea button to start brewing. This function will automatically stop when brewing is complete. Pressing the button again while brewing, will stop the process.

Note: After the tea brewing some water remains in the tea holder. Wait until the cycle is completely finished.

Coffee/K-Cup:
- Fill the water reservoir. Insert your k-cup into the adapter or put coffee powder (max 15g) into ground coffee adapter- twist and close. Close the top lid making sure to hear a click sound.
- Press the coffee button to start brewing. This function will automatically stop when brewing is complete. Pressing the button again while brewing, will stop the process.

- You can adjust the cup shelf for tall or short cups. When placing the cup shelf into the machine- hold the bottom of the cup shelf, and insert the protruding end into slot. When taking out the cup shelf, hold the bottom of the cup shelf and lift it out.

Note: The machine will not be able to operate without water in the water reservoir or if the milk tank is not assembled.
CAPPUCCINO:
- Fill the water reservoir.
  Insert your k-cup into the adapter or put coffee powder into ground coffee adapter-twist and close.
- Fill the milk tank with enough milk for one cup of cappuccino.
- Close the top lid making sure to hear a click sound.
- Press the cappuccino button to start brewing. This function will automatically stop when brewing is complete. Pressing the button again while brewing, will stop the process.

MILK FOAM:
- Fill the water reservoir.
- Place a cup under the milk foam spout. Adjust the position of the milk foam spout.
- Press milk foam button to start brewing. This function can be stopped manually by pressing the milk foam button again or automatically after 30 sec.

CAUTION: When brewing cappuccino or latte, make sure to adjust the frothing tube lever to the angle of the cup.

TEA:
- Fill the water reservoir. Add 3g of tea leaves into the tea adapter-twist and close.
- Close the top lid making sure to hear a click sound.
- Press the tea button to start brewing. This function will automatically stop when brewing is complete. Pressing the button again while brewing, will stop the process.

LATTE:
- Fill the water reservoir.
- Insert your k-cup into the adapter or put coffee powder into ground coffee adapter-twist and close.
- Close the top lid making sure you hear a click sound.
- Fill the milk tank with enough milk for one cup latte.
- Press latte button to start brewing. This function will automatically stop when brewing is complete. Pressing the button again while brewing, will stop the process.

Note: The difference between cappuccino and latte is the milk foam volume and its brewing time.

IMPORTANT NOTE FOR GROUND COFFEE:
- Avoid using fine espresso coffee powder as this may block the screen filter.
- Only medium-coarse ground coffee should be used.
- Do not overfill coffee powder in the screen line.
CLEANING AND MAINTENANCE

- Remove the main plug from the wall outlet and let the appliance cool down. Make sure the appliance is completely cooled off before cleaning.

MILK SYSTEM CLEANING

1. Pour out the milk.
2. Remove the milk tank cover and the milk tube.
3. Press the release button on the milk chamber and pull out the chamber.
4. Remove the milk spout.
5. Open the cover on the foaming chamber-turn and remove the foaming tube.
6. It is very important to thoroughly clean the milk frothing system.
7. Clean all the parts before next use.

Warnings

1. If the functions on the machine automatically complete- let the machine shut down and wait a few minutes before restarting.
2. After continuously using (6 cycles, and less then 10 minutes between 2 cycles) the machine will be hot, the system will use the water to cool off the machine. Steam will escape from the steam release hole and the drip plate tray will become hot. Do not touch.

CAUTION:

- In order to protect the system make sure there is a 3 minute cooling time between 2 milk foam function cycles.
- After the milk foam spout is finished frothing- the milk foam spout will be very hot. Do not touch the metal parts.
- Holders may be hot after brewing- handle with care.
- The K-cup Holder has a sharp blade on the inside of the container- which is designed to puncture the capsule, handle with care to avoid injury from the needle.
- The water temperature inside the holder is extremely hot, therefore, do not open the upper jaw areas while brewing is taking place.
- Always make sure there is nothing blocking the milk spout and milk tube at anytime.
- Clean the milk spout and milk tube daily.

The following table gives the suggested cleaning intervals:

<table>
<thead>
<tr>
<th>Type of Water</th>
<th>Cleaning Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soft Water (Filtered Water)</td>
<td>Every 80 Brew Cycle</td>
</tr>
<tr>
<td>Hard Water (Tap Water)</td>
<td>Every 40 Brew Cycle</td>
</tr>
</tbody>
</table>

Disposal

Dispose of the packaging in the proper manner. If at any time you should need to dispose this product please note that waste electrical products should not be disposed of with household waste. Please recycle. Check with your local Authority or retailer for recycling advice.
## TROUBLESHOOTING

WARRANTY & SERVICE

This Limited Warranty is for one full year from the date of purchase. It is applicable to the original purchaser only and is not transferable to a third party user. Repair or replacement of defective parts is solely at the seller’s discretion. In the event that repair isn’t possible, the seller will replace the product/part. If product repair/replacement won’t suffice, the seller has the option of refunding the cash value of the product or component returned.

Product defects not covered under the Warranty provisions include normal wear and damage incurred from use or accidental negligence, misuse of instruction specifications or repair by unauthorized parties. The manufacturing company is not liable for any incidental or consequential damages incurred by such circumstances.
