Welcome to the Exciting World of the
Electronic Kettle with Tea Infuser
from Gourmia

Congratulations on your purchase of the Electronic Kettle with removeable Tea Infuser from Gourmia, exclusively designed for the discerning consumer!

If you are one of those individuals who look forward to a warm gentle start to the day, a soothing mid-afternoon break, or a comfortable way to unwind and relax each evening - you’ve made the right choice.

Our new Gourmia Electronic Kettle, offers more options when preparing your fresh tea or coffee, then ever before. The unit in loaded with rich features and settings that allow you to take full control over every aspect of a “warm” drinking experience. Time settings; temperature settings; and keep warm settings are just a few of the many options and conveniences that await you.

We’re confident that you’ll find your new Electronic Kettle a practical and versatile appliance, which you will use over and over again!

The pages of this manual offer full and comprehensive instructions to guide you through the functions and features of the Gourmia Electronic Kettle. Inside this guide you will also find information on its modes of operation, complete step-by-step instructions for the operation, assembly, cleaning, and maintenance of your appliance.

Please read all safety instructions thoroughly to ensure safe usage at all times.

Thank you for your purchase! We sincerely hope you will enjoy this as well as all the many innovative products brought to you by our family at Gourmia.
WARRANTY & SERVICE

This Limited Warranty is for one full year from the date of purchase. It is applicable to the original purchaser only and is not transferable to a third party user. Repair or replacement of defective parts is solely at the seller’s discretion. In the event that repair isn’t possible, the seller will replace the product/part.
If product repair/replacement won’t suffice, the seller has the option of refunding the cash value of the product or component returned.
Product defects not covered under the Warranty provisions include normal wear and damage incurred from use or accidental negligence, misuse of instruction specifications or repair by unauthorized parties. The manufacturing company is not liable for any incidental or consequential damages incurred by such circumstances.

ATTENTION: Please read these instructions carefully to avoid damage due to incorrect use. Please pay particular attention to the safety guide. If you pass the device on to a third party, these Operating Instructions must also be handed over.

SAFETY GUIDE

- Incorrect operation and improper use can damage the appliance and cause injury to the user.

- The appliance must be used only for its intended purpose. No responsibility can be taken for any possible damage caused by incorrect use or improper handling.

- Before plugging in the appliance, check that the current and power match those given on the rating plate.

- Do not put the appliance or the plug in water or any other liquid. This could cause a fatal electric shock. If the appliance or plug should accidentally become wet, unplug the appliance immediately and have it checked by an electrician before using it again.

- Do not place any kind of object into the inside of the kettle.

- Do not use the appliance with wet hands, on a damp floor or when the appliance itself is wet.

- Do not touch the plug with wet or damp hands.

- Check the cable and the plug regularly for any possible damage. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid the hazard.

- Do not use the appliance if it is dropped or otherwise damaged or if the cable or plug are damaged. In case of damage, take the appliance to an electrical repair shop for examination and repair if necessary.

- Never attempt to open the appliance or repair the appliance yourself. This could cause an electric shock.

- Do not allow the cable to hang over sharp edges and keep it well away from hot objects and open flames. Remove the plug from the socket only by holding the plug.

- For extra protection it is possible to fit the electric household installation with a fault current breaker with a rated breaking current of not more than 30mA. Ask your electrician for advice.

- Make sure there is no chance the cable or extension cable inadvertently be pulled or cause anyone to trip over it when in use.

- If an extension cord is used it must be suited to the power consumption of the appliance, otherwise
overheating of the extension cord or plug may occur.

- Place the appliance on a firm, level and heatproof surface away from open flames (e.g. gas oven)
- This appliance is neither suitable for commercial or outdoor use.
- The cordless kettles should only be used with the provided stand.
- Remove the plug from the socket when the appliance is not in use and before it is cleaned.
- As long as the appliance is connected to the mains socket, a small amount of current continues to flow to the appliance even when it’s not in use.
- Never use the cable to carry the appliance.
- This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

**ADDITIONAL SAFETY INFORMATION**

- Use the kettle only with the base supplied, and do not use the base for any other purposes.
- Check the level marks (MAX) when filling. Do not overfill the kettle. Scalding water could boil over.
- Take care to close the lid properly before switching on. Otherwise, hot water may overflow.
- The kettle is for heating water only, and is not to be used for any other liquid.
- CAUTION! Danger of burns! The kettle becomes very hot during use. So hold it by the handle only.
- WARNING! Escaping steam! Do not remove the lid while the water is boiling.
- Allow the water to cool down in a safe place out of the reach of children and disabled people.
- Keep out of the reach of children.

**To cancel PRESET MODE**

Power off the kettle and restart.

---

**TIPS:**

- You can pour the water out without opening the lid.
- To stop the water boiling or interrupt it briefly, press the power button.
- Note: This appliance comes with a safety device, which automatically switches off the heater element if the appliance is inadvertently switched on while empty, or if it boils dry. If this happens, let the appliance cool down completely, before filling with water again.
THE ART of STEEPING TEA

True tea lovers take great care when preparing their choice of tea. Achieving a specific tea’s unique character in each cup is a true art. The temperature needs to be just right. The amount of tea needs to be just right. And the steeping time needs to be just right. When the temperature is matched to a particular tea, and steeping is done correctly, tea lovers will savor and appreciate all of that tea’s naturally aromatic flavors and health benefits. Refer to the chart below for our recommendations. But remember, tastes and teas vary; you can always adjust them to your personal preference. Enjoy!

1. To achieve the initial Steeping Temperature, press the “FUNCTION” button 4 times to activate the WARM mode.
2. Set desired Steeping Temperature by using the UP or Down arrows. The left side of the screen will display the actual temperature.
3. While waiting for the water to reach desired temperature, fill the Steeping Basket with the amount of tea indicated.
4. When desired temperature is reached you may begin Steeping. Press the Automatic Switch button on the handle to open the lid. Keep hands away from opening as the vapor could be very hot. Carefully insert Steeping Basket into the opening on the Kettle.
5. Allow the tea to Steep as indicated on the chart below.
6. Remove Steeping Basket.

(Padded gloves may be indicated as the vapor around the opening could be very hot. Close the lid.

The most accepted formula for most teas is to add 1 teaspoon or bag of tea per cup of water. However some herbal blends can benefit from a bit more tea. When making a full pot, an extra teaspoonful is recommended.

CLEANING & MAINTENANCE

- Always remove the plug from the mains socket before cleaning the base.
- Let the kettle cool down completely.
- Clean the outside of the kettle and the base with a soft damp cloth.
- Dry the kettle before plugging into the mains again.
- Descale the appliance regularly. Preferably use a special detergent, which can be obtained from specialist shops, and follow the instructions given.
- To store kettle; wind the cord in the cord compartment on the underside of the base.
